

Agilyx demonstrates continued technology leadership with issuance of continuation patent

OSLO, Norway – November 2, 2022 – Agilyx ASA (OSE: AGLX; OTCQX: AGXXF) (“Agilyx” or “the company”), a technology company that enables customers to recycle the most challenging post-use plastics to high value, virgin-equivalent products, is pleased to announce the issuance of US patent 11,466,215 further demonstrating Agilyx’s expertise and leadership in chemical recycling via pyrolysis. The patent is a continuation of previously patented technology regarding the depolymerization of polymers to monomers and mixed plastics to oils via pyrolysis.

About Agilyx

Agilyx ASA is a technology company that enables customers to recycle difficult-to-recycle post-use plastics to high value, virgin-equivalent products. With a focus on diversion and conversion of plastic waste, Agilyx is uniquely positioned with a molecular recycling technology offering and an integrated feedstock solution by way of Cyclyx, an innovative feedstock management consortium of partners that drives up global plastic recycling rates by chemically fingerprinting plastic waste and matching it to appropriate recycling processes. Agilyx conversion technology utilizes pyrolysis without a catalyst and can convert mixed waste plastic to naphtha and fuels or depolymerize specific plastics such as polystyrene and PMMA (acrylic) back into virgin-quality products.
