Agilyx ASA announces successful arrangement of senior debt facility

OSLO, Norway – July 5, 2023 – Agilyx ASA (OSE: AGLX; OTCQX: AGXXF) ("Agilyx" or "the company"), a technology company that enables customers to recycle the most challenging post-use plastics to high-value, virgin-equivalent products, announced it has arranged through DNB ASA a $5 million senior secured debt facility. The facility will carry a fixed annual coupon of 12% and the net proceeds will be used for general corporate purposes.

Future reporting dates

Interim results for the six months ending 30 June 2023 will be reported on 22 August 2023.

Notes to editors

Agilyx ASA is a technology company that enables customers to recycle difficult-to-recycle post-use plastics to high value, virgin-equivalent products. With a focus on diversion and conversion of plastic waste, Agilyx is uniquely positioned with a molecular recycling technology offering and an integrated feedstock solution by way of Cyclyx, an innovative feedstock management consortium of partners that drives up global plastic recycling rates by chemically fingerprinting plastic waste and matching it to appropriate recycling processes. Agilyx was the first to establish a commercial-scale waste polystyrene chemical recycling facility via pyrolysis enabling closed-loop polystyrene plastic-to-plastic and holds 20 patents. Agilyx conversion technology utilizes pyrolysis without a catalyst and can convert mixed waste plastic to naphtha and fuels or depolymerize specific plastics such as polystyrene and PMMA (acrylic) back into virgin-quality products.
