Loan to value ratio and RWA on home mortgage loans

Loan to value ratio on home mortgage loans

- The proforma figures for SpareBank 1 Sør-Norge show that 88.9% of the exposure is within 85% of the assessed value of collateral.

Risk weight home mortgages

- RWA on home mortgages reflects a solid portfolio with a moderate loan-to-value ratio and low potential loss.
- Risk weights on home mortgage loans are subject to a regulatory floor of 25%.

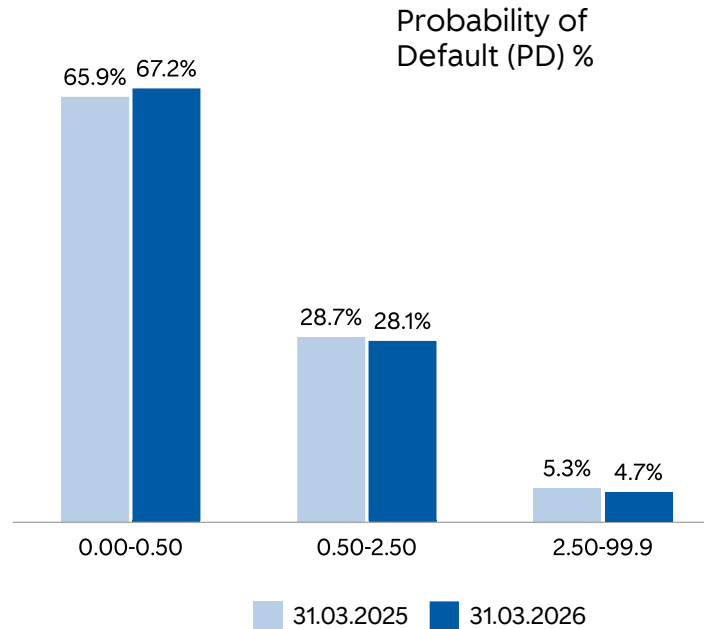

*In a total-distributed loan to value ratio, the entire loan is allocated to one and the same interval.
Home mortgages as defined in the Norwegian IRB framework; the value of the residential property must be at least 30% of a loan's security.*

Profile of the loan portfolio

- SpareBank 1 Sør-Norge has a solid loan portfolio.
- The loan portfolio consists mainly of small and medium-sized loans.

Loan portfolio distributed by risk class

Loan portfolio distributed by size of loan

Probability of default (PD) through a full cycle of loss.

Risk profile

- Portfolio distributed by risk class

Retail market

- The quality of the retail market portfolio is considered to be very good and has low potential losses.
- The low risk profile is achieved through prudent customer selection and requirements for moderate LTV. Most of the portfolio is secured against a mortgage on real estate, and lending is overall moderate compared to asset value.

Corporate market

- The quality of the corporate market portfolio is considered to be good.
- There is a clearly defined framework that sets limits on what is funded and conditions for particular funding purposes. This ensures a robust portfolio.

Probability of default (PD) through a full cycle of loss.
