

Acceptance of Clinical Data for Scientific Publication - UnoMeter™ Safeti™ Max

Oslo, 26 May 2026 – Observe Medical ASA (the "Company" or "Observe Medical") is pleased to announce that an Abstract with in vitro clinical data related to the Company's UnoMeter™ Safeti™ Max has been accepted for presentation and publication by the International Continence Society.

The accepted Abstract presents findings from in vitro studies evaluating the product's ability to protect patients from Catheter Associated Urinary Tract infection (CAUTI), the most common hospital-acquired infection and a major global healthcare burden, representing a multi-billion-dollar annual cost through direct treatment expenses, prolonged hospitalization, and infection-related complications.

The Company believes the acceptance represents an important scientific validation of its technology and supports the continued commercial development of the UnoMeter™ portfolio.

"We are very encouraged by the acceptance of these data for publication on a respected scientific platform," said Jørgen Mann, CEO. "Peer-reviewed publication is an important step in building scientific credibility and increasing awareness of the value creation of our technology. We see that UnoMeter™ Safeti™ Max has the potential of redefining protection against catheter associated Urinary tract infection (CAUTI) and at the same time offering healthcare providers with a health-economic contribution of managing budget restraints and to support the sustainability agenda"
