## A word from the CEO

In the second quarter, we have continued to execute against the priorities we established at the beginning of the year; reducing the cost base further, converting commercial opportunities into firm customer orders, and advancing initiatives to strengthen the balance sheet and long-term capital structure.

The operational restructuring measures implemented over the past twelve months have materially changed the Company's financial profile. The business now operates with a significantly lower cost base, lower cash requirements and improved operational flexibility compared to a year ago.

Commercially, the activity across our end markets remained below the level required to break-even. However, we have multiple customer dialogues, across both hydrogen and battery-electric applications, and converting these opportunities into firm orders remains management's highest operational priority. Although the operating environment remains demanding, the actions taken over the past year leave the Company materially better positioned than it was a year ago.

Looking ahead, our priorities remain unchanged; drive growth and build financial resilience. While the timing of market recovery is uncertain, the long-term fundamentals and drivers supporting hydrogen and battery-electric technologies remain in place.

I would like to thank our employees, customers, suppliers, investors and partners for their continued support as we navigate through this challenging restructuring phase.

**Morten Holum**  
Chief Executive Officer, Hexagon Purus

# Hexagon Purus Q2 2026 consolidated financials

## Profit and loss

In the second quarter of 2026, Hexagon Purus ("the Company" or "the Group") generated revenue and other income of NOK 146 million, down 25% compared to the corresponding period in 2025. Excluding the U.S. divestment which occurred in the first quarter of 2026, the decrease in revenue was 6% and primarily driven by lower activity within transit bus and industrial gas applications, partly offset by higher activity in hydrogen infrastructure.

Cost of materials as a percentage of revenue was 56% (52%) in the second quarter of 2026. Payroll-related expenses totaled NOK 126 (152) million in the second quarter of 2026, which includes NOK 17 million in restructuring costs related to workforce reductions.

Other operating expenses amounted to NOK 41 million in the second quarter of 2026, which compares to NOK 101 million in the same period last year. Total operating expenses in the second quarter of 2026 amounted to NOK 248 (355) million, leading to an operating profit before depreciation (EBITDA) of NOK -102 (-161) million.

Depreciation and impairment in the second quarter of 2026 was NOK 44 million, compared to NOK 66 million in the same period last year. Of the NOK 44 million, NOK 36 million relates to depreciation of property, plant & equipment and amortization of intangible assets, and NOK 9 million relates to right-of-use-assets (RoU) depreciation. Operating profit (EBIT) in the second quarter of 2026 ended at NOK -147 (-227) million.

Share of profit/loss from investments in associates, which reflects Hexagon Purus' minority shareholding in the CIMC-Hexagon joint venture, was NOK -5 (-3) million in the second quarter of 2026. Finance income in the quarter was NOK 20 (39) million, of which approximately NOK 2 million relates to interest income on bank deposits and approximately NOK 18 million relates to foreign exchange fluctuations. Finance expense in the second quarter of 2026 was NOK 85 (82) million, of which approximately NOK 72 million relates to non-cash interest on the 2023/2028 and 2024/2029 convertible bonds. A further approximately NOK 7 million is driven by interest on lease liabilities and other interest-bearing debt, and the remainder of approximately NOK 6 million relates to foreign exchange fluctuations.

Tax expense in the second quarter of 2026 was NOK -1 (-1) million, and net profit after tax ended at NOK -215 (-272) million.

## Balance sheet

Like the profit and loss statement, the balance sheet is not directly comparable year-over-year, reflecting the change in the Group's consolidation perimeter during the first quarter of 2026 (the divestment of the U.S. business and the deconsolidation of the China JV). Sequential movements during the second quarter of 2026 primarily reflect underlying operating developments.

Total assets at the end of the second quarter of 2026 amounted to NOK 1,866 (2,600) million. Property, plant and equipment totaled NOK 629 (1,147) million at quarter-end. Right-of-use assets amounted to NOK 318 (512) million at quarter-end, while intangible assets ended at NOK 590 (665) million.

Inventory amounted to NOK 382 (714) million at the end of the second quarter of 2026 and was more or less unchanged compared to the first quarter of 2026. Trade receivables stood at NOK 180 (244) million at quarter-end, and was down from NOK 238 million in the first quarter of 2026 driven by cash collection from customers. No material trade receivables are considered at risk as of the balance sheet date. Cash and cash equivalents amounted to NOK 308 (527) million at the end of the second quarter of 2026.

Total equity amounted to NOK 41 (1,418) million at the end of the second quarter of 2026, corresponding to an equity ratio of 1% (33%). While the Group's consolidated equity ratio is at a low level, it is not expected to constrain near-term operations. Furthermore, the Company continues to actively evaluate its capital structure and broader financial framework, including structural measures relating to the Group's outstanding convertible bonds, with the objective of strengthening the balance sheet, improving financial flexibility and supporting the long-term development of the business (see further information provided in Note 12)

Non-current liabilities amounted to NOK 2,390 (2,222) million at the end of the second quarter, of which NOK 1,958 (1,691) million comprised interest-bearing debt, primarily related to the two outstanding convertible bonds, maturing in Q1 2028 and Q1 2029,

respectively. Lease liabilities totaled NOK 391 (503) million at quarter-end. Total current liabilities stood at NOK 383 (626) million at the end of the second quarter of 2026, with trade payables amounting to NOK 109 (148) million.

### Cash flow

Net cash flow from operating activities in the second quarter of 2026 amounted to NOK -47 (-197) million. The quarter included a working capital release of NOK 57 (-41) million, primarily driven by a significant reduction in trade receivables, while inventory and trade payable levels remained broadly stable.

### Group net working capital

Net cash flow from investing activities amounted to NOK -2 (62) million in the second quarter of 2026. Capital expenditures in the quarter ended at NOK -2 (-37) million. Capitalized product development was NOK -1 (-8) million, and primarily reflects targeted investment in a small number of next-generation product and technology initiatives. Interest received on cash deposits amounted to NOK 1 (6) million in the quarter.

### Group capital expenditure (property, plant & equipment and capitalized product development)

Net cash flow from financing in the second quarter of 2026 was NOK -12 (-3) million. Cash interest payments and repayment of interest-bearing debt amounted to NOK -1 (-1) million in the second quarter of 2026, and repayment of lease liabilities amounted to NOK -11 (-21) million.

Net change in cash and cash equivalents in the second quarter of 2026 was NOK -61 (-262) million, and currency exchange differences on cash was NOK 5 (-5) million. Cash and cash equivalents ended at NOK 308 (527) million as of the second quarter of 2026.

## Hydrogen Mobility and Infrastructure (HMI)

Hexagon Purus' hydrogen storage solutions are based on its leading type 4 cylinder technology and enables the safe and efficient use of hydrogen in a variety of zero-emission mobility and hydrogen infrastructure applications. The Hydrogen Mobility and Infrastructure (HMI) segment covers Hexagon Purus' hydrogen cylinder and systems manufacturing activities in Europe, as well as its industrial gas business. The divested U.S. business was included in the reported figures for the comparative period, until its divestment on 1 March 2026.

### Revenue and other income

NOK million

### EBITDA

NOK million

### Financial development

Revenue and other income for the HMI segment amounted to NOK 129 million in the second quarter of 2026, representing a decrease of 21% year-over-year. Excluding the divested U.S. business, which occurred during the first quarter of 2026, segment revenue grew by 3% year-over-year. The underlying revenue development was primarily driven by lower activity within transit bus and industrial gas applications, offset by increased revenue from hydrogen infrastructure following the delivery of four hydrogen distribution modules to customers during the quarter.

From a revenue mix perspective, hydrogen infrastructure solutions accounted for 62% (9%) of HMI segment revenue in the second quarter of 2026, corresponding to NOK 80 (16) million. Hydrogen mobility, which includes the sale of Type 4 hydrogen cylinders and cylinder systems for hydrogen-powered on-road and off-road vehicles, generated revenue of NOK 21 million in the second quarter of 2026, down 76% from NOK 88 million in the same period last year. This application area represented 16% (52%) of total HMI revenue, with transit bus applications accounting for almost all hydrogen mobility revenue at NOK 18 (84) million.

Revenue from the Company's industrial gas business, which provides stationary storage solutions primarily for air gases such as nitrogen and oxygen, totaled NOK 19 million in the second quarter of 2026, reflecting a 29% year-over-year decline.

EBITDA for the HMI segment was NOK -52 (-76) million in the second quarter of 2026, which includes NOK 15 million in restructuring costs related to workforce reductions in Germany.

### Operational update

Commercial activity remained broad-based during the quarter across hydrogen infrastructure, hydrogen mobility and industrial gas applications. Customer engagement continues with both established industrial gas companies and emerging hydrogen ecosystem developers, although project conversion remains slower than desired.

The operational focus during the quarter remained unchanged: executing efficiently on existing customer orders while continuing to adjust the manufacturing footprint and organizational structure to prevailing demand. As a result, the segment operates from a materially lower cost base than a year ago.

## Battery Systems and Vehicle Integration (BVI)

The Battery Systems and Vehicle Integration (BVI) segment covers Hexagon Purus' industry-leading battery storage systems technology and complete vehicle integration services for medium- and heavy-duty trucks in North America.

### Revenue and other income

NOK million

### EBITDA

NOK million

## Financial development

Revenue and other income for the BVI segment totaled NOK 16 (25) million in the second quarter of 2026. This reflects two vehicle deliveries to Hino and sublease revenue from the Dallas facility.

EBITDA for the BVI segment amounted to NOK -21 (-31) million in the second quarter of 2026.

## Operational update

Following completion of the restructuring program earlier this year, the segment's focus during the second quarter was on executing against the existing Hino order backlog, maintaining strict cost and cash discipline, and continuing to evaluate strategic alternatives for the business.

Two class 8 battery-electric trucks were delivered to Hino during the quarter, with the remaining vehicles under the current order backlog expected to be delivered during the third quarter.

The North American regulatory and market environment remains challenging, resulting in limited near-term demand visibility.

## Outlook

Management's priorities remain unchanged.

The Company will continue to align its cost base and operational footprint with prevailing market conditions while preserving the capabilities required to support future growth. The restructuring actions implemented over the past twelve months have fundamentally reset the Company's cost base, significantly reducing the revenue required to achieve EBITDA break-even and improving the operating leverage of the business. At the same time, commercial execution remains the Company's highest operational priority, with a continued focus on converting customer engagement into firm orders and strengthening revenue visibility.

While market conditions remain challenging, the Company enters the second half of 2026 with a materially lower cost base, improved operational flexibility and reduced cash requirements than a year ago, and the Company remains well positioned to capture growth opportunities.

Maintaining financial flexibility remains a key priority, and developing options to strengthen the Company's balance sheet and capital structure, including structural measures relating to the outstanding convertible bonds, is high on the agenda.

## Forward-looking statements

The forward-looking statements made above are, by their nature, subject to significant risks and uncertainties because they relate to events and depend on circumstances that are expected to occur in the future. They are therefore not guarantees of future performance. While the statements reflect the current views and expectations of Hexagon Purus based on information currently available to it, they are subject to various assumptions, in addition to risks and uncertainties that may be outside of its control.

In particular, statements regarding the Group's liquidity position, capital structure measures, future order intake and revenue depend on developments that are highly uncertain. Readers are cautioned against placing undue reliance on statements regarding the Group's future financial position.

Hexagon Purus cannot provide any assurance that the assumptions underlying such forward-looking statements are free from errors nor accept any responsibility for the future accuracy of the opinions expressed herein, or the actual occurrence of the forecasted developments. Actual results could differ materially from those expressed or implied in forward-looking statements. Any forward-looking statements are based only on conditions as of the date on which they are made and we are under no obligation to update or alter such forward-looking statements whether as a result of new information, future events or otherwise.

## Risks and uncertainties

Hexagon Purus operates in markets with strict standards for quality and delivery, deviations from which could result in significant additional costs, lost sales and damage to the Group's reputation. The Group is exposed to production-related risks such as production errors or shutdowns of its facilities, which could have a material adverse effect on the Group's results of operations, cash flow and financial condition.

The Group continues to incur operating losses and has not yet reached operational break-even. While the Company has implemented significant measures to reduce cash burn and improve liquidity, future cash generation remains dependent on improved

market conditions, increased order intake and continued operational execution. The Group is also evaluating capital structure measures, including measures relating to the outstanding convertible bonds, to support the long-term development of the business. There can be no assurance that such measures will be available on acceptable terms, or at all, and failure to improve operating performance or complete such measures could adversely affect the Group's financial position and future development.

The Group is exposed to competing technologies and processes that could have a negative effect on the Group's competitive positioning, and in turn profitability and financial position.

The Group is exposed to developments in the prices and availability of its raw materials and in particular the cost of carbon fiber and lithium-ion batteries. The prices and availability of these raw materials are linked to various factors including developments in the price of oil, precursor commodities and energy and the prevailing market balance where supply is dependent on a limited number of suppliers. To mitigate the risk, the Group will from time to time enter into long-term supply agreements, locking in price and quantity. Even though the contracts are intended to mitigate supply risk, it would also potentially add risk, as they commit the Group on material and components, where actual demand can turn out to be lower than forecasted, market prices can fall, or the development could make the committed volumes technologically less relevant.

The Group is also exposed to global macroeconomic developments including the impact of inflation, supply chain constraints and rising interest rates. In recent years, there have been several hydrogen initiatives from governmental and international bodies around the world which puts a spotlight on the role hydrogen technology can play in the global energy transition. The Group faces potential impacts from changes to current and future incentives related to decarbonization or ESG topics, which could affect the adoption of hydrogen or battery electric technologies and, consequently, the

Group's performance. Additionally, shifts in policies and legislation following changes to government may introduce new regulatory challenges and support for clean energy initiatives, posing further risks to the Group's performance. It is not possible to know the precise impacts of such developments and to what extent these may or may not persist.

Changes in international trade policies, including the imposition of new tariffs or adjustments to existing ones, may impact Hexagon Purus's cost structure and supply chain reliability. Tariffs on key raw materials or components could increase input costs, potentially affecting margins and pricing strategies. Additionally, evolving trade

relations and regulatory shifts in key markets can introduce uncertainty that may influence investment decisions, production planning, and global market access.

For additional information about risks and uncertainties please see to Hexagon Purus' 2025 annual report.

## Statement from the Board and CEO

To the best of our knowledge, we confirm that:

- The consolidated and unaudited financial statements for the period 1 January to 30 June 2026 have been prepared in accordance with IAS 34 *Interim Financial Reporting*;
- The information presented in the half-year report provides a true and fair view of the Group's and the Company's assets, liabilities, financial position, and results for the period as a whole;
- The report also includes a fair review of important events during the period, the principal related party transactions, and a description of the key risks and uncertainties facing the Group for the remainder of the financial year.

## Note 1: General information and basis for preparation

---

The condensed consolidated interim financial statements for the first half of 2026, which ended 30 June, comprise Hexagon Purus ASA and its subsidiaries (together referred to as "the Group"). Hexagon Purus ASA, the parent of Hexagon Purus Group, is a public limited liability company with its registered office in Norway. The company's headquarters are at Haakon VII's gate 2, 0161 Oslo, Norway. Hexagon Purus ASA is listed on Oslo Børs, under the ticker HPUR.

The condensed consolidated interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting. For a more detailed description of accounting principles, reference is made to the consolidated

financial statements for the year ended 31 December 2025, available on the Company's website: [www.hexagonpurus.com/investors](http://www.hexagonpurus.com/investors).

The accounting principles used in the preparation of these interim accounts are generally the same as those applied to the annual consolidated financial statements referred to above. The Group has not adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

These condensed consolidated interim financial statements were approved by the Board of Directors on 15 July 2026.

## Note 2: Estimates

---

The preparation of the interim accounts entails the use of valuations, estimates and assumptions that affect the application of the accounting policies and the amounts recognized as assets and liabilities, income, and expenses. The actual results may deviate from these estimates.

The material assessments underlying the application of the Group's accounting policy and the main sources of uncertainty are the same as for the consolidated accounts for 2025.

## Note 3: Revenue

### Convertible bonds

The Company has two outstanding senior unsecured convertible bonds (2023/2028 and 2024/2029) amounting to a face value of 1,799,950 million at the respective time of issuance.

The 2023/2028 convertible bond with an outstanding amount of NOK 800,000,000 was issued in March 2023 and carries a fixed interest rate of 6% paid semi-annually in kind, through issuance of additional bonds. The conversion price of the bond is set at NOK 326.4, and the conversion right can be exercised at any time between the loan issue and the last conversion date, which is set to 16 March 2028, being the date which is 5 years after the Shareholders' Meeting that resolved the convertible bond. Mitsui & Co., Ltd. ("Mitsui"), which subscribed for an amount of NOK 500,000,000 under the 2023/2028 convertible bond, entered into a 2-year lock-up on its investment in the 2023/2028 convertible bond, under which it may not transfer its bonds during this time period. Further, Mitsui entered into a 180-day lock-up for shares received upon conversion prior to 3 years from the disbursement date of the 2023/2028 convertible bond, and a 90-day lock-up for shares received upon conversion after 3 years from the disbursement date of the 2023/2028 convertible bond. Furthermore, Mitsui has entered into an additional lock-up in respect of the 2023/2028 convertible bond and the 2024/2029 convertible bond, as described below.

The 2024/2029 convertible bond with an outstanding amount of NOK 999,950,000 was issued in February 2024 and carries a fixed interest rate of 10% paid semi-annually in kind, through issuance of additional bonds. The conversion price of the bond is set at NOK 122.0, and the conversion right can be exercised at any time between the loan issue and the last conversion date, which is set to 11 January 2029, being the date which is 5 years after the Shareholders' Meeting that resolved the convertible bond. Mitsui, which subscribed for an amount of NOK 500,000,000 under the 2024/2029 convertible bond, entered into a 2-year lock-up on its investment in the 2024/2029 convertible bond, under which it may not transfer its bonds during this time period. Further, Mitsui entered into a 180-day lock-up for shares received upon conversion prior to 3 years from the

issue date of the 2024/2029 convertible bond, and a 90-day lock-up for shares received upon conversion after 3 years from the issue date of the 2024/2029 convertible bond. Furthermore, Mitsui has entered into an additional lock-up in respect of the 2023/2028 convertible bond and the 2024/2029 convertible bond, as described below.

On 25 September 2024, the Company signed an agreement with Mitsui where the parties have agreed that Mitsui shall not use a right to convert to ordinary shares or to dispose of any of its convertible bonds under the 2023/2028 convertible bond or the 2024/2029 convertible bond, without the written consent of the Board of Directors of the Company until the earlier of (i) the date on which the Company becomes profitable on a Profit After Tax (PAT) basis (measured by PAT attributable to equity holders of the parent in the Company's group income statement), and (ii) 1 January 2028 for the 2023/2028 convertible bond and 1 January 2029 for the 2024/2029 convertible bond, respectively (together referred to as the "Additional Lock-up"). The Additional Lock-up applies to Mitsui only, and the rights for other holders of the 2023/2028 convertible bond and 2024/2029 convertible bonds are as per the original convertible loan agreements. The Additional Lock-up shall not apply in certain events, including the occurrence of a Corporate Transaction Event (as defined in the terms for the convertible bonds), event of default or tender offer relating to the Company. The terms of the existing lock-up undertakings provided by Mitsui, as described above, will remain in force.

The convertible bonds are compound financial instruments which contain an equity component and a debt component. Upon initial recognition, the debt component is calculated as the discounted value of the bond assuming no conversion with an approximate market interest rate for similar loans without the conversion feature as the discount rate. For calculation purposes, a 15% discount rate has been applied, yielding a fair value at initial recognition of the debt component of NOK 521.6 million for the 2023/2028 bond and NOK 790.3 million for the 2024/2029 bond. The equity component equals the residual difference between the fair value of the convertible bond at issuance and the fair value of the debt component and amounts thus to NOK 278.4 million for the 2023/2028 bond and NOK 209.7 million for the 2024/2029 bond. Transaction costs related to the bond issue amounted to NOK 23.1 million for the 2023/2028 bond and NOK 26.8 million for the 2024/2029 bond and have been capitalized pro rata between the debt and equity component. See summarized tables related to the convertible bonds below.

| Lease payments                                   | -30 327        | -42 091        |
| Interest expense on lease liabilities            | 13 517         | 18 663         |
| Currency translation differences                 | -22 088        | -34 450        |
| <b>Carrying value as of 30 June</b>              | <b>427 296</b> | <b>549 165</b> |

Lease liabilities are largely related to lease agreements for office- and production premises, as well as leases for production equipment, machinery and vehicles.

## Note 8: Intangible assets

The Group's intangible assets primarily consist of goodwill related to prior acquisitions, capitalized technology and development costs, patents and licenses, and customer relationships. Intangible assets are tested for impairment whenever indicators of impairment exist, while goodwill and intangible assets under development are assessed at least annually or more frequently if impairment indicators are identified.

As described in the annual financial statements for 2025, impairment indicators were identified for certain operations during 2025, primarily reflecting weaker near-term market conditions, lower demand visibility and revised assumptions for parts of the business. As a result, impairment charges were recognized in 2025 related to the BVI CGU, including impairment of capitalized technology and development assets. No additional impairment charges related to intangible assets were recognized during the first half of 2026.

The Group continues to closely monitor market developments, order intake, liquidity, operational performance and broader industry conditions. Given the current market uncertainty and limited near-term visibility in the Company's market environment, further changes in assumptions, market outlook or execution could impact future impairment assessments and the carrying values of intangible assets and goodwill.

## Note 9: Share-based payments

As of 30 June 2026, the Company had two share-based long-term incentive plans outstanding consisting of performance share units (PSU) and restricted share units (RSU). The number of outstanding instruments has been adjusted on a 10:1 basis to reflect the share consolidation completed in May 2026.

### PSU programs

All PSUs are non-transferable and will vest subject to satisfaction of the applicable vesting conditions. The actual number of PSUs vested will depend on performance and can vary from zero to the maximum awarded PSUs in each program.

### RSU program

All RSUs are non-transferable and will vest subject to satisfaction of the applicable vesting conditions. The RSUs are subject to continued employment three years after date of grant, and each participant will at such time receive such number of Hexagon Purus shares as corresponds to the number of RSUs allocated to them.

The fair value of the PSUs is calculated on the grant date, using Black-Scholes and Monte Carlo simulation, and the cost is recognized over the service period. As of

30 June 2026, the year-to-date cost of the share-based payment schemes, including social security, was NOK 9.2 million. The unamortized fair value of all outstanding RSUs and PSUs as of 30 June 2026 is estimated to be NOK 17.8 million (NOK 41.7 million as of 30 June 2025). There are no cash settlement obligations.

1) CIMC Hexagon Hydrogen Energy Technologies Ltd. is being accounted for as an associated company applying the equity method as of 31.03.2026 following loss of control and deconsolidation of the company as a subsidiary effective on the same date.

## Note 11: Going concern

Throughout 2025 and so far in 2026, the Company has executed a broad range of initiatives to materially reduce cash burn, strengthen liquidity and improve financial flexibility. These include a significant reduction in workforce, resizing of the BVI segment, completion of major capacity expansion programs resulting in a structurally lower capital expenditure profile, enhanced working capital discipline, the divestment of the U.S. aerospace business, and a financing arrangement for the Chinese joint venture that reduced near-term funding requirements while preserving the Company's strategic position in the Chinese market.

As a result of these measures, liquidity has been strengthened and projected cash outflow in 2026 is expected to be significantly lower than in 2025. Current forecasts indicate that the Group has sufficient liquidity to meet its obligations as they fall due for at least the next 12 months from the date of these financial statements. However, the Group continues to operate in a market environment characterized by uncertainty, continued operating losses and limited near-term demand visibility. Continued losses during the period have further reduced the Group's consolidated equity. Order intake below break-even levels and weaker-than-expected operational performance remain key risks.

In light of the Company's equity position, the Board has considered its obligations under Sections 3-4 and 3-5 of the Norwegian Public Limited Companies Act. While the statutory assessment under Sections 3-4 and 3-5 is performed at the level of the parent company (Hexagon Purus ASA), the Board has also considered the Group's consolidated financial position, including its equity ratio, operating losses and future funding requirements, as part of the holistic assessment required under Section 3-4. For a holding company whose principal activities consist of owning and financing subsidiaries, the Board considers that the assessment of the Company's financial position, risk and scope of operations cannot be undertaken without regard to the consolidated group's position, while recognizing that the statutory obligations attach to the parent company as a separate legal entity. Based on the information, analyses and forecasts presented to the Board, the Board has concluded that the statutory requirements remain satisfied at the parent company level and will continue to monitor the position on an ongoing basis. At the same time, the Group's consolidated financial position reinforces the Board's assessment that a broader balance sheet restructuring is required, and the Company therefore continues to pursue structural measures relating to the Group's outstanding convertible bonds with the objective of strengthening the balance sheet, improving financial flexibility and supporting the long-term development of the business. The Board considers that various structural alternatives are available to strengthen the Company's capital structure, but the implementation, timing and outcome of such measures remain uncertain.

Accordingly, the Board has concluded that the financial statements are appropriately prepared on a going concern basis.

## Note 12: Events after the balance sheet date

---

There have been no material events after the balance sheet date that have not already been disclosed in this report.

## Alternative Performance Measures (APMs)

---

Hexagon Purus discloses certain alternative performance measures (APMs) in addition to those normally required by IFRS as such performance measures are frequently used by analysts, investors and other parties as supplemental information to gauge the Group's operational and financial performance. The APMs are also used internally to drive performance in terms of monitoring operating performance and long-term target setting. APMs are adjusted IFRS measures that are defined, calculated and used in a consistent and transparent manner over the years and across the Group where relevant.

- **Gross margin** is defined as revenue less direct and indirect cost of goods sold, before selling, general & administrative expenses
- **EBITDA** is defined as earnings before interest, tax, depreciation, amortization and impairment. EBITDA corresponds to operating profit/(loss) before depreciation, amortization and impairment
- **EBIT** is defined as earnings before interest and taxes. EBIT corresponds to "operating profit" in the consolidated income statement in the report
- **Equity ratio** is defined as total equity divided by total assets
- **Order backlog** is defined as the estimated value of remaining work on firm purchase orders with agreed price, volume, timing, terms and conditions
- **Order intake** is defined as the estimated value of firm customer purchase orders received during the period, with agreed price, volume, timing, and terms and conditions. Order intake reflects the net change in order backlog from one period to the next less revenue recognized in the period and any adjustments or cancellations

## Shareholder information

The total number of shares in Hexagon Purus ASA as of 30 June 2026 was 42 848 611 (par value NOK 1.0). In the quarter, the share price moved between NOK 10.20 and NOK 16.90, ending the quarter at NOK 11.99. The share price as of 30 June 2026 implies a market capitalization of NOK 514 million for the Company.

## Forward-looking statements

This quarterly report (the "Report") has been prepared by Hexagon Purus ASA ("Hexagon Purus" or the "Company"). The Report has not been reviewed or registered with, or approved by, any public authority, stock exchange or regulated marketplace. The Company makes no representation or warranty (whether express or implied) as to the correctness or completeness of the information contained herein, and neither the Company nor any of its subsidiaries, directors, employees or advisors assume any liability connected to the Report and/or the statements set out herein. This Report is not and does not purport to be complete in any way. The information included in this Report may contain certain forward-looking statements relating to the business, financial performance and results of the Company and/or the industry in which it operates. Forward-looking statements concern future circumstances and results and other statements that are not historical facts, sometimes identified by the words "believes", "expects", "predicts", "intends", "projects", "plans", "estimates", "aims", "foresees", "anticipates", "targets", and similar expressions. The forward-looking statements contained in this Report, including assumptions, opinions and views of the Company or cited from third party sources are solely opinions and forecasts which are subject to risks, uncertainties and other factors that may cause actual events to differ materially from any anticipated development. None of the Company or its advisors or any of their parent or subsidiary undertakings or any such person's affiliates, officers or employees provides any assurance that the assumptions underlying such forward-looking statements are free from errors nor does any of them accept any responsibility for the future accuracy of the opinions expressed in this Report or the actual occurrence of the forecasted developments. The Company and its advisors assume no obligation to update any forward-looking statements or to conform these forward-looking statements to the Company's actual results. Investors are advised, however, to inform themselves about any further public disclosures made by the Company, such as filings made with Euronext Growth or press releases. This Report has been prepared for information purposes only. This Report does not constitute any solicitation for any offer to purchase or subscribe any securities and is not an offer or invitation to sell or issue securities for sale in any jurisdiction, including the United States. Distribution of the Report in or into any jurisdiction where such distribution may be unlawful, is prohibited. This Report speaks as of 15 July 2026, and there may have been changes in matters which affect the Company subsequent to the date of this Report. Neither the issue nor delivery of this Report shall under any circumstance create any implication that the information contained herein is correct as of any time subsequent to the date hereof or that the affairs of the Company have not since changed, and the Company does not intend, and does not assume any obligation, to update or correct any information included in this Report. This Report is subject to Norwegian law, and any dispute arising in respect of this Report is subject to the exclusive jurisdiction of Norwegian courts with Oslo City Court as exclusive venue. By receiving this Report, you accept to be bound by the terms above.
