

Cloudberry Clean Energy ASA presenting at Pareto Securities' Energy Conference and announces a signed agreement for 200 MW powered land development

Oslo, Norway, 15 September 2026: Cloudberry Clean Energy ASA ("Cloudberry" or the "Company") is pleased to announce that the Company is presenting at Pareto Securities' Energy Conference in Oslo tomorrow. The presentation outlines how the Company is uniquely positioned for a new energy reality in the Nordics with sustained, high power prices; an active M&A market with ongoing consolidation; and the emergence of the Nordics as Europe's hub for large-scale AI data centers.

In connection with the presentation, Cloudberry announces that the Company has signed a significant agreement to develop a large-scale powered land project in Selbu together with Winn Eiendom. The Selbu project represents expected total max gross capacity of more than 200 MW and is an important step in Cloudberry's strategy to develop attractive powered land opportunities in the Nordics.

The signing in Selbu comes in addition to the previously announced powered land project in Skien, where Cloudberry is developing approximately 160 MW together with Løvenskiold. Together, the projects demonstrate Cloudberry's ability to identify and develop attractive powered land opportunities in cooperation with strong local partners.

"These agreements demonstrate Cloudberry's ability to combine local presence, industrial partnerships and renewable energy expertise to develop attractive infrastructure opportunities in the Nordics. We see strong long-term demand for powered land and believe Cloudberry is well positioned to take an active role in this market," says Anders Lenborg, CEO of Cloudberry.

The presentation is available on Cloudberry's website, www.cloudberry.no.
