

Paul-Étienne Lardeau appointed as new CFO in Cambi

Asker, Norway, 30 September 2026

Paul-Étienne Lardeau has been appointed as the new Chief Financial Officer (CFO) of Cambi ASA, effective 1 January 2027.

Lardeau is currently the Director of Project Controlling in Nexans Power Transmission in Norway. Previously, he was the CFO of the Agri-Food Industry Division in the family Group Le Duff and held various finance positions in Alstom Transport Group. He brings with him international experience, having worked in both Canada and France.

Lardeau holds a Master's degree in Finance and Strategy from Sciences-Po Paris and a Master of Science in Engineering from École Centrale Paris.

Commenting on the appointment, Per Lillebø, Chief Executive Officer, said: "I am pleased that Lardeau is joining Cambi's management team. He brings international experience and a broad financial background, having held roles across accounting, project controlling, financial management, and CFO leadership. With this breadth of experience and expertise, Lardeau will support Cambi in achieving its growth ambitions."

Lardeau said: "I am excited to join Cambi and become part of the team. I look forward to bringing my experience to the role, working closely with colleagues across the organisation, and contributing to Cambi's continued growth and development."

About Cambi

Cambi is a global provider of technologies and services for water and wastewater treatment and organic materials management. Since 1992, the company has served utilities, municipalities, and industrial customers.

The thermal hydrolysis process (THP) remains Cambi's core technology. More than 100 Cambi THP systems are in operation across more than 25 countries on 6 continents. The process is used in conjunction with anaerobic digestion to enhance the treatment of organic feedstocks, increase biogas production, improve dewatering, and reduce final biosolids volumes. It can be integrated into new and existing facilities and supports downstream routes ranging from land application to thermal processing.

The wider portfolio includes technologies for nutrient recovery and digestion, lifecycle services, biosolids logistics and land application, composting, and soil production.

Cambi ASA is listed on Euronext Growth Oslo under the ticker CAMBI. Find out more at cambi.com.
