

Observe Medical Announces Repeat Order for UnoMeter Safeti MAX Following Successful Customer Evaluation

Oslo, 30 September 2026 - Observe Medical ASA (the "Company" or "Observe Medical") today announces a repeat customer order for UnoMeter Safeti MAX, following a comprehensive customer evaluation and successful testing of the product and its unique, patented technology.

The repeat order follows the customer's thorough evaluation of UnoMeter Safeti MAX in clinical use, including its innovative product features and the potential clinical and health-economic benefits of the solution. **Following the successful evaluation, the customer has chosen to place a new order**, providing an important early commercial validation of both the product and the underlying patented technology.

UnoMeter Safeti MAX represents an important innovation within urine measurement and is designed to improve clinical workflow, patient safety and ease of use. The product incorporates **proprietary and patented technology**, differentiating it from traditional urine measurement solutions.

The repeat order represents an important milestone in the commercialization of UnoMeter Safeti MAX. Observe Medical is experiencing **good traction following the product launch**, with increasing customer interest and a growing pipeline of commercial opportunities.

"We are very pleased to see a customer move from a thorough evaluation of UnoMeter Safeti MAX to placing a repeat order. This is particularly important to us, as the decision follows hands-on testing of the product and its unique patented technology in a clinical setting. We see this as an encouraging early validation of the value proposition and an important step in building recurring commercial demand for UnoMeter Safeti MAX," said Jørgen Mann, CEO of Observe Medical ASA.

With UnoMeter Safeti MAX successfully launched and now generating repeat orders following customer evaluations, Observe Medical continues to focus on converting its growing pipeline and customer interest into further commercial orders and broader market adoption.
