IDEX Biometrics receives largest IDEX Access order to date

IDEX Biometrics ASA (Euronext Oslo Børs: IDEX) has received a significant purchase order ("PO") of more than USD 450,000 for complete IDEX Access Cards. The PO was received from one of IDEX's channel partners and is the largest IDEX Access order to date.

The card will be used for end-customers in the energy and retail industries, both in Europe and APAC. Delivery is scheduled to start in Q4 2026.

The order is for complete IDEX Access Cards rather than sensors. Complete cards carry meaningfully higher average selling prices and gross margins than sensor-only sales. IDEX and the channel partner see potential for further orders as the solution is rolled out to more customers in the partner's customer base.

"This is our largest Access order so far, and it comes through a partner. That is how IDEX scales: partners bringing our solution to their own customer base. These industries have demanding environments for access security, with staff moving between physical areas and digital systems throughout the day," says Kjell-Arne Besseberg, CEO of IDEX Biometrics.

About Us

*IDEX Biometrics ASA (OSE: IDEX) develops and makes fingerprint **biometric cards for access control**, digital identity and payment. By authenticating identity through fingerprint biometrics rather than passwords, PINs or traditional credentials, IDEX enables secure and convenient access to physical and digital services. Fingerprint matching happens directly on the card, offline and without transmitting biometric data. Certified by Visa, Mastercard, FIDO2 and EAL6+, and backed by more than 250 patents and over USD 350 million invested in R&D, IDEX serves banks, enterprises and public sector organizations directly and through channel partners worldwide.*
