

Nordic Aqua Partners: Operational update for Q3 2026

Another milestone reached in Q3 with harvest volumes at 1,838 tonnes and third consecutive quarter with production volumes in excess of 2,000 tonnes.

Harvest

Harvest in Q3 amounted to 1,838 tonnes head-on gutted (HOG). Average harvest weight was 4.4 kg HOG, equivalent to 5.3 kg live weight (LW), with a superior rate of 95%.

Harvest for the first nine months of 2026 amounts to 3,971 tonnes HOG, with an average harvest weight of 4.4 kg HOG, equivalent to 5.3 kg live weight (LW), with a superior rate of 95%.

Farming

Production during the third quarter of 2026 was 2,233 tonnes bringing the total biomass to 5,662 tonnes, corresponding to full capacity for Stage 1 and 2.

First nine months of 2026 production amounts to 6,687 tonnes.

Overall biological performance remains strong with good fish health, no significant maturation and high survival rates.

For the full year 2026, total harvest volume is expected in the 5,700-6,000 tonnes HOG range.

The full Q3 2026 report will be released on 12 November 2026 at 07:00 CET.
