BLADDER CANCER
COMPANY

Photocure ASA - New CFO Appointed

Oslo, Norway, October 22, 2026: Photocure ASA (OSE: PHO), the Bladder Cancer Company, is today announcing that Dennis Camporeale has been appointed as Chief Financial Officer, effective on Monday, October 26, 2026.

Dennis Camporeale brings 25 years of experience as senior healthcare investment banker and corporate finance leader across life science tools, diagnostics, medtech and broader healthcare. He most recently led the Life Science Tools and Diagnostics practice at Canaccord Genuity, advising boards and executive teams on capital raising, M&A, restructuring and strategic development. Alongside his advisory background, Mr. Camporeale brings meaningful operational experience from Ally Financial, where he helped transform GMAC from a captive finance subsidiary into a standalone public company. He supported the company's successful US IPO, international divestments and the development of the financial controls, governance structures and reporting processes required for a publicly listed organisation.

"I am delighted to welcome Dennis to Photocure as our new CFO. His experience across medtech, diagnostics and broader life sciences investment banking brings a valuable combination of industry insight, financial expertise and strategic perspective to the company," said Dan Schneider, CEO of Photocure. "As we continue to advance our growth strategy and broaden our reach to unlock the full potential of our emerging portfolio, Dennis's experience will be instrumental in helping us execute our ambitions and create long-term value for patients, partners and shareholders."
