#1 market position for boards and beams in the Nordics and growing internationally

Byggma segment	Boards	I-beams	Windows and doors	Lighting
Companies / brands	FORESTIA HUNTONIT smartpanel®	MASONITE BEAMS	ULDAL	ANETA LIGHTING LIGHTS FOR HOME AND WORK SINCE 1947
Product illustrations	 		 	 
Nordic market position	Clear #1 position within particle boards, decorative interior panels, fibreboards, MDF interior walls and ceiling panels	Clear #1 position within I-beams	Growing market position	Growing market position
International market position	Large position in Netherlands, growing in Europe within refined products	Large and growing position in UK		

Highly attractive offering towards all the major building material chains in the Nordics

Highest production capacity in the Nordics[1]

Superior product quality versus competition

In-house developed innovative products and solutions

Good control of the distribution chain

No need for large inventory (unlike international players)

Large flexibility in manufacturing

Delivering to all the leading building material chains in the Nordics, with high client satisfaction

Byggma is set to continue demonstrated growth through identified growth avenues

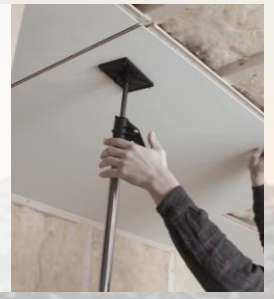

Growth initiatives (NOKm)

Investment highlights

Market leading position	▪ The leading Nordic provider of woodchip boards, decorative interior panels, wood fibre boards, MDF interior walls & ceiling panels, and I-Beams ▪ Growing position in Europe and within adjacent product areas ▪ Sales agreements with all major building materials chains
Strong underlying market	▪ >80% of revenues in the Nordics ▪ Large, stable and growing underlying market ▪ The Norwegian building materials industry is a NOK 50bn market
Strong brands and broad portfolio of sustainable products	▪ Recognized brands and continuous focus on product development ▪ Diversified portfolio from commodity products to highly refined products ▪ Utilizing renewable raw materials to provide sustainable building material solutions
Long history of growth	▪ Long history of revenue growth (CAGR of >9% since 2000), both organically and through acquisitions ▪ Improving profitability, from >8% EBIT in 2020 to >9%* in 2024, and with high cash conversion ▪ High dividend capacity, with NOK 70m paid in 2022. Policy of 30-50% of net income going forward.
Well positioned for further growth and cash generation	▪ Well defined growth strategy within all business areas, both organic and inorganic ▪ Large potential from transition to higher share of innovative and value-added products with higher average sales price ▪ Set to leverage on demonstrated M&A capabilities – with several targets identified

Large potential from recent product innovations

	Walls2Paint	Premium Ceiling	Proff Vegg
	FORESTIA walls 2 paint 2014 	FORESTIA Premium Ceiling 2020 	HUNTONIT PROFF VEGG 2020 
Description	▪ Wood-based, wallpapered wall boards	▪ A ready to paint plain ceiling panel with a unique 4-sided locking profile ▪ Launched after the highly successful introduction of Walls2Paint	▪ Click-based wall boards ▪ Paintable immediately after installation and are also suitable for tapestry
Benefits	▪ No need for spackeling ▪ Superior indoor climate ▪ Tree-based boards with high screwability ▪ Easy to install ▪ Installable on top of existing walls	▪ No need for spackeling ▪ Superior indoor climate ▪ Tree-based boards with high screwability ▪ Easy to install ▪ Installable on top of existing roof	▪ No need for spackeling ▪ Strong resistance to variations in temperature- and humidity ▪ Paintable immediately after installation ▪ Highly suitable for tapestry ▪ Recommended by Norges Astma- og Allergiforbund

* 2024, 2023 and 2022 are not including agio and rent covered by IFRS

Byggma still has ample available production capacity and high growth potential from value-added products

Company / brand	Key financials (YTD 2026)	Nominal production capacity	Available capacity	Growth potential	Other potential
FORESTIA	Revenue: NOK 922m EBITDA: NOK 80m	300,000 m^3 / year	~25%	HIGH — Large potential from transitioning to higher share of innovative/ value-added products with higher average sales price	Production capacity can be expanded by ~10% by extending the manufactoring line
HUNTONIT	Revenue: NOK 325m EBITDA: NOK 31m	60,000 ton / year	~ 40%	HIGH — Growth potential both through available production capacity and innovative, higher priced products such as "Proff Vegg"	
smartpanel®	Revenue: NOK 58m EBITDA: NOK (25m)	3.5 million m^2 / year	~ 40%	HIGH — Growth potential both through available production capacity and innovative, higher priced products such as "Fuktbestandig"	
MASONITE BEAMS	Revenue[1]: NOK 289m EBITDA[1]: NOK (16m)	15 million running meters / year	~ 60%	HIGH — Large potential through utilizing significant available production capacity. High international sales potential	

Note 1: The numbers for Masonite Beams include Masonite Beams AS, Masonite Beams AB and Masonite Beams LTD
Note 2: Smartpanel have moved the production to Huntonit AS

Targeted approach towards environmentally friendly production and initiatives

1 **Raw material sourcing**

Byggma utilize sustainable wood raw materials from certificated sources

2 **Production line**

Byggma has invested in modern and energy efficient production equipment to secure full utilization of the raw material when processing it in the factories

3 **Product refining**

Byggma produces products with significant environmental benefits compared to products based on other raw materials

4 **Product application**

Byggma products store significant amounts of carbon and have low emissions to the indoor air

5 **Product recycling**

Byggma's wood-based products can be recycled into new products and thereby contribute to the circular economy

BYGGMA group

Byggma‘s manufacturing and product offering contribute to a more environmentally friendly society

5.8%

The CO_2 sequestration from Byggma’s board products corresponds to 5.8% of the Norway’s total road traffic emission

47%

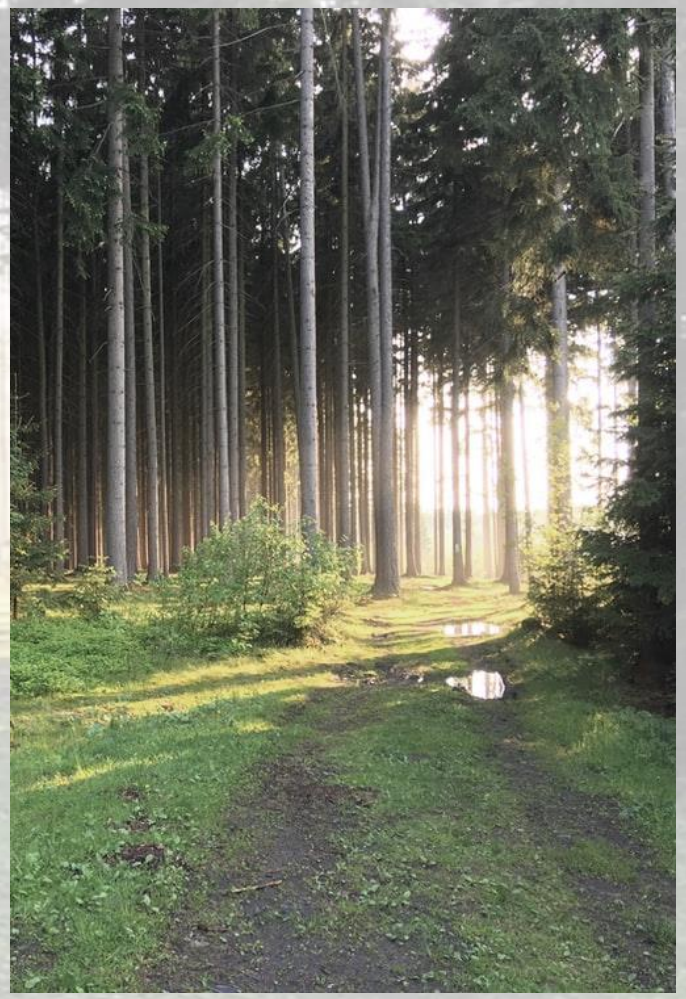

Masonite’s I-beam systems use 47% less raw material compared to massive tree constructions

12%

Huntonit’s specific energy consumption has been reduced by 12% over the last 5 years

48%

Forestia’s new closed cooling system has contributed to 48% reduction in use of cooling water

Byggma takes an active role towards sustainability and responsible production

Byggma's main goal is to develop and deliver sustainable solutions based on renewable raw materials and unique competense. Sustainability is, and has always been, a core element in Byggma's business model and a natural part of its overarching goal. Management and Board of Directors in Byggma wish for sustainability to be a natural part of operations and innovation in the Byggma group

Climate and Environment

- Effective utilization of raw materials
- Manufacturing facilities located with proximity to raw materials
- Packaging solutions with minimum waste while ensuring protection during transportation
- Wood-based building materials store significant amounts of carbon
- Effective distribution system for transportation of goods to customers
- The wood that is applied is sourced from certified suppliers or sustainable forestry
- Resource effective constructions lead to good utilization of raw materials
- Ensure that we do not pollute the environment that affects life on land, watercourses or the ocean.

Human and Society

- Employees are given the opportunity for personal and professional development
- Collaborations with academia
- Vocational education
- Advanced training
- Factories with proximity to raw materials
- Byggma's presence contributes to sustainable cities and communities
- Byggma's presence provides significant assignments and income for other players in the value chain

Business model

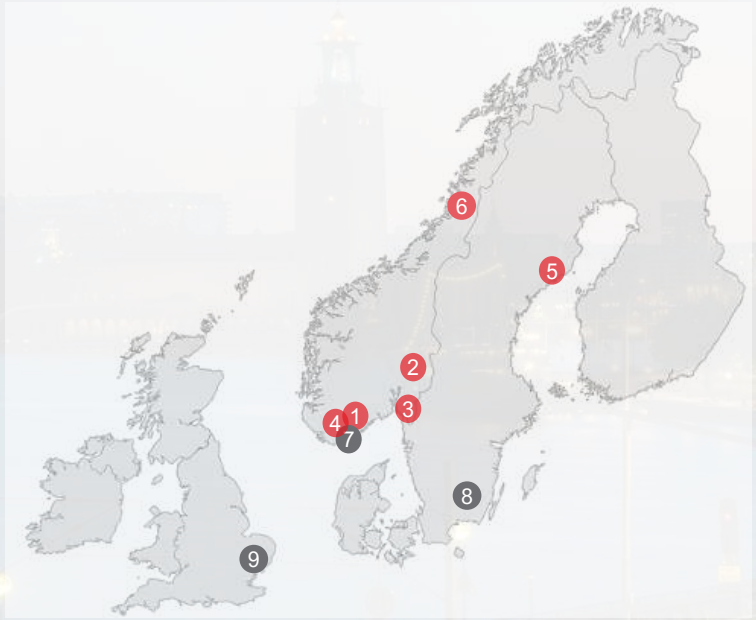

- Good profitability gives basis for secure jobs and development of the companies
- Byggma is seeking new and innovative solutions for a better customer experience and a more profitable and efficient construction prosess
- Focus on the triple bottom line in all R&D activities
- Increased efficiency and streamlining of operations through continuous improvement and industrial investments

Revenue by country (NOKm)

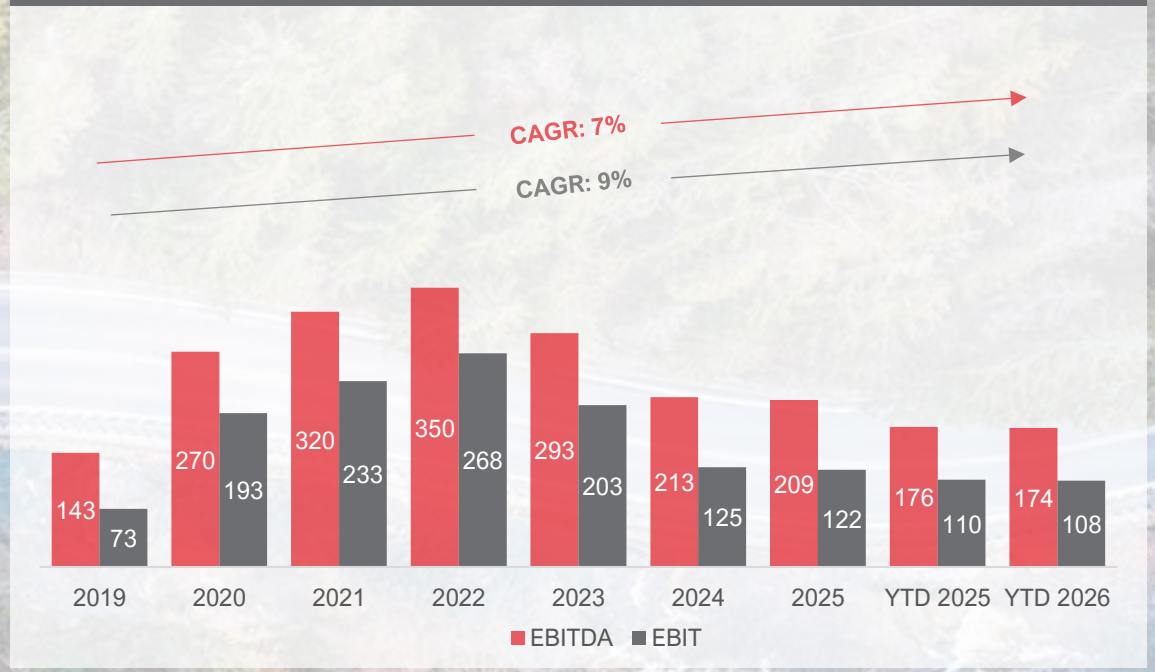

Strong topline and profitability improvements last few years

Revenue (NOKm)

- Organic growth from 2015-2018, while the growth from 2018 is a combination of organic growth initiatives and the acquisition of Smartpanel (2018) and Byggform (2019), adding NOK 117m in revenues in 2019, and NOK 34m in 2020 (full-year effect of the Byggform acquisition)
- The growth in 2020 and 2021 is partly related to realized market synergies from increased market share following the Smart Panel acquisition. Other growth drivers include change in product mix, volume increase (partly off-set by a drop in Europe), price increases and other (incl. currency)

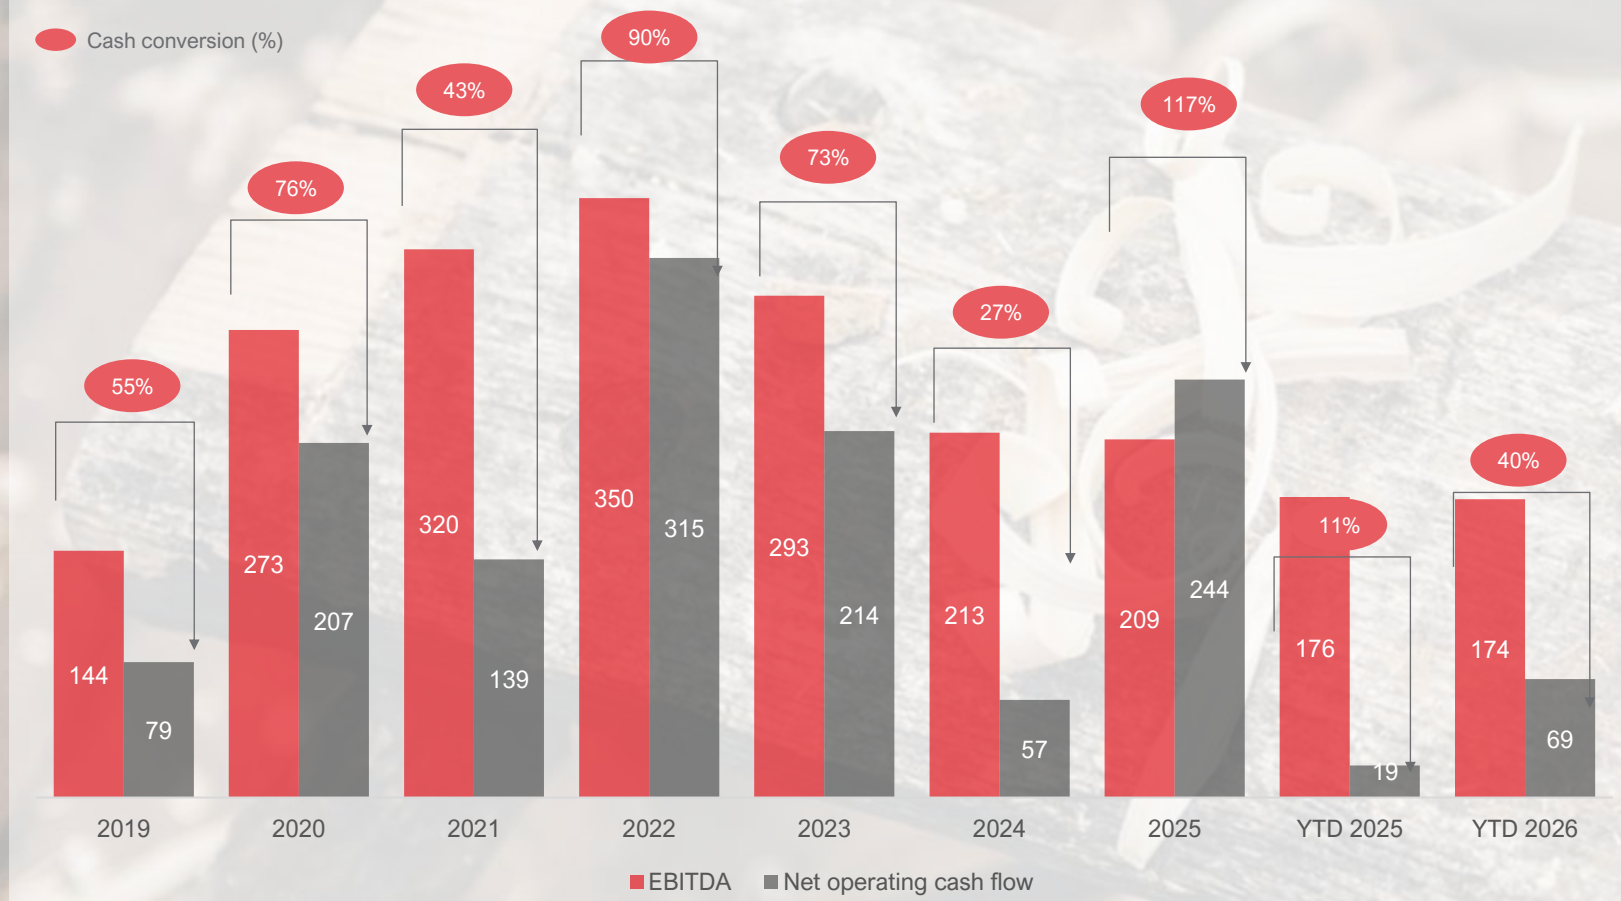

Consolidated EBITDA and EBIT (NOKm)

- The strong improvement is primarily due to realization of synergies from the Smartpanel acquisition, product mix optimization and price increases. Byggma has seen an increase in raw material prices and experienced unfavorable currency development, but has been able to offset this by increase prices to end users and ultimately improve the margins
- In 2019, the EBITDA and EBIT have been adjusted for normalizations following the acquisition of Smartpanel in 2018

Robust cash conversion ratio

Operating cash flow and cash conversion (NOKm)

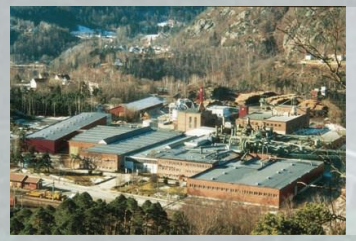

- Byggma has a history of strong cash flow generation over the last years which is set to continue going forward
- This has allowed the company to invest significantly in product innovation in addition to increased manufacturing capacity and efficiency
- Byggma has targeted a long-term dividend payout ratio of minimum 30%-50%
  - The company will pay out a higher dividend when possible after evaluating various growth opportunities
