31 December 2025: 58.9

Market capitalisation (USD million)

181.8

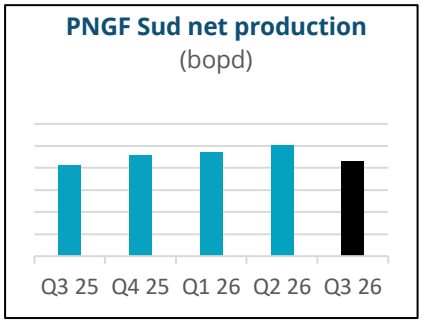

31 December 2025: 150.1

Nine months ended
30 September 2026
Net profit (USD million)

60.7

Q3 2025: 5.4

- **Q3 net production rate was 4,298 bopd[1] (4,116 bopd Q3 25)**
- **Production is expected to increase with infill drilling scheduled early 2027**
- **Commercial solutions sought for accelerating value of OML113**

OPERATIONS

Production

Republic of Congo – PNGF Sud

PetroNor E&P ASA ("PetroNor" or the "Company") has three production licence agreements (Tchibouela II, Tchendo II, and Tchibeli-Litanzi II), which cover six oil fields located in 80-100 meter water depths approximately 25 km off the coast of Pointe-Noire. The oil field complex was discovered in 1979, commenced production in 1987, and is called PNGF Sud.

The PNGF Sud fields are developed with eleven wellhead platforms and currently produce from 79 active production wells, with oil exported via the onshore Djeno terminal.

The infill drilling programme targeting Tchibouela East was completed in December 2025. Additional infill opportunities are expected to be proposed in the budgets for 2027 and 2028.

Overall gross production for Q3 2026 was 2.35 MMbbls (Q3 2025: 2.25 MMbbls), corresponding to 0.40 MMbbls (Q3 2025: 0.38 MMbbls) net to the Company.

As signalled with the second quarter results, third quarter production has been impacted by an unusually high number of wells requiring a workover intervention to restore capacity. This translates into a lower production efficiency for the quarter of 90% compared with 93% in the previous quarter. In response, a third crew has been engaged to address the workover queue. An improvement in efficiency and production rate is expected in the fourth quarter.

Revised audited reserve and resource estimates as at 31 December 2025 are published in our annual report.

Development

Nigeria – OML 113 / The Aje field

Seismic reprocessing, reservoir static and dynamic modelling has been completed yielding higher estimates of in-place and recoverable volumes. Engineering and firming up development costs is in progress to be able to make a concept select and FID.

Alongside redevelopment work with the OML 113 partners, PetroNor identified a risk that legal uncertainties elsewhere in the Group could restrict access to the capital required to fund redevelopment, potentially delaying the project. In response, PetroNor appointed Talanger Capital to assess commercial options, including a potential divestment or farm-down of its interest in OML 113. Bids from interested parties are expected during Q4.

Health, safety and environment (HSE)

Health, safety and environmental performance remain core priorities for PetroNor and its operating partners. The Company maintains a clear HSEQ objective of zero accidents and incidents across all activities.

Operations are carried out by the relevant operators on behalf of the licence partners, with regular reporting against

[1]Effective 16.83 per cent net to PetroNor working interest production with preliminary only production allocations for September.

key HSE indicators. During the third quarter, the operator of PNGF Sud reported no lost time incidents.

No significant known breaches of exploration licence conditions or applicable environmental regulations were reported during the quarter. PetroNor also recorded no accidents, injuries, incidents or environmental claims in the period.

Financial performance and activities

PetroNor's financial performance for the nine months ended 30 September 2026 benefited from the timing of the April oil lifting, which coincided with a peak in oil prices for the year, and continued production from PNGF Sud.

Revenue for the nine-month period was USD 176.2 million, compared with USD 38.6 million in the corresponding period of 2025. The increase primarily reflected the April lifting; there was no lifting in the comparative period. Revenue included crude oil sales and the gross-up of royalty and tax oil recognised under the Group's accounting policy.

Royalty and tax oil revenue increased despite lower production volumes, reflecting higher overall oil prices.

Subsequent production reduced the initial overlift position from approximately 520 thousand barrels to 83 thousand barrels, with a remaining liability of USD 9.36 million.

Cost of sales for the nine-month period was USD 63.5 million, compared with USD 2.2 million in the corresponding period of 2025, reflecting movements in the overlift position. In the third quarter, the reduction in the overlift liability resulted in a net credit to cost of sales of USD 15.8 million, contributing to quarterly gross profit of USD 29.1 million. Royalty expenses for the nine-month period were USD 19.6 million, compared with USD 14.3 million in the prior-year period.

Administrative expenses decreased to USD 5.9 million for the nine-month period, from USD 6.3 million in the corresponding period of 2025, reflecting continued cost discipline and the benefits of earlier organisational restructuring. Legal and professional expenses remained broadly in line with the comparative period.

Profit after tax attributable to shareholders increased to USD 50.5 million for the nine-month period, from USD 3.9 million in the corresponding period of 2025. Total Group profit after tax was USD 60.7 million, compared with USD 5.4 million. The improvement reflected the strong realised oil price achieved on the April lifting and the subsequent reduction in the overlift position.

The Group ended September 2026 with cash and cash equivalents of USD 73.5 million, compared with USD 58.9 million at the end of 2025. Net cash generated from operating activities was USD 80.7 million for the nine-month period. The closing cash balance reflected the return of USD 50.0 million of capital to shareholders in June 2026 and USD 10.3 million of dividends paid to non-controlling interests. During the third quarter, cash decreased by USD 11.7 million, primarily reflecting the absence of further oil liftings and ongoing operating expenditure.

Following the default of an OML 113 partner, PetroNor's project economic interest and voting interest under the joint operating agreement increased to 59.6 per cent. This followed the completed acquisition of Aje Exploration Nigeria Ltd, which increased PetroNor's direct interest in OML 113 and resulted in the recognition of additional licence interests and associated assets and liabilities. The Group continues to evaluate commercial options for its OML 113 interest, including a potential divestment or farm-down.

The board of directors has reviewed the Group's liquidity position, expected operating cash flows and planned capital commitments, and remains satisfied that the Group has adequate financial resources to continue as a going concern.

CORPORATE

Principal risks

The Group participates in oil and gas projects in countries in West Africa with emerging economies, such as Congo Brazzaville and Nigeria.

Oil and gas exploration, development and production activities in such emerging markets are subject to a number of significant political and economic uncertainties as further detailed in the annual report. These may include, but are not limited to, the risk of war, terrorism, expropriation, nationalisation, renegotiation or nullification of existing or future licences and contracts, changes in crude oil or natural gas pricing policies, changes in taxation and fiscal policies, imposition of currency controls and imposition of international sanctions.

Indictment of Hemla Africa Holding AS ("Hemla")

In January 2026, Økokrim indicted subsidiary company Hemla in relation to suspected corruption committed on behalf of Hemla. The Company categorically contests the indictment and awaits the opportunity to have the case thoroughly examined in court in late 2026. The trial is expected to last 10 weeks with a ruling announcement in 2027. Any result will most probably then be subject to appeal by either side; therefore, the final decision outcome will take some time.

The indictment creates a legal obligation to incur defence costs and exposes Hemla to the risk of potential fines and penalties depending on the final outcome of the court process.

Significant events after reporting date

There are no significant events after the reporting date.

Outlook

PNGF Sud production will replenish the overlift position, to give a positive oil inventory at year end, with further oil sales expected in H1 2027.

The operator forecasts that the year-end exit rate for gross production will exceed 25,500 bopd (net to PetroNor ~4,300 bopd). 2027 initial budgets include a return to infill-drilling of five new wells, and an intention of raising gross production levels back up above 33,000 bopd in the course of year.

The Company will evaluate any commercial options received for possible divestment or farm-down of the equity held in OML113.

Notes to the interim financial statements

Note 01 Corporate information

The consolidated interim financial statements of the Company and its subsidiaries (together "the Group") for the period ended 30 September 2026 was authorised for issue in accordance with a resolution of the directors on 19 November 2026.

PetroNor E&P ASA is a 'for profit entity' and is a company limited by shares incorporated in Norway. Its shares are publicly traded on the Oslo Børs (ticker: PNOR), the main regulated marketplace of the Oslo Stock Exchange, Norway. The principal activities of the Group are the exploration and production of crude oil.

Note 02 Basis of preparation

The general purpose interim financial statements for the quarter and nine months ended 30 September 2026 have been prepared in accordance with IAS 34 Interim Financial Reporting and the supplement requirements of the Norwegian Securities Trading Act (Verdipapirhandelloven).

The interim financial statements do not include all notes of the type normally included within the annual financial report and therefore cannot be expected to provide as full an understanding of the financial performance, financial position and financing and investing activities of the Company as the full financial report.

It is recommended that the interim financial statements be read in conjunction with the Annual Report for 2025 and considered together with any public announcements made by the Company during the period Q3 2026 in accordance with the continuous disclosure obligations of the Oslo Børs. A copy of the annual report is available on the Company's website www.petronorep.com.

The interim financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) which have been adopted by the EU. The interim financial statements have been prepared on a historical cost basis, and on the basis of uniform accounting principles for similar transactions and events under otherwise similar circumstances.

The interim financial statements are presented in United States Dollars.

The accounting policies adopted are consistent with those disclosed in the annual report for the year ended 31 December 2025.

The preparation of the interim financial statements entails the use of judgements, estimates and assumptions that affect the application of accounting policies and the amounts recognised as assets and liabilities, income, and expenses. The estimates and associated assumptions are based on historical experience and other factors that are considered to be reasonable under the circumstances. The actual results may deviate from these estimates. The material assessments underlying the application of the Company's accounting policies and the main sources of uncertainty are the same for the interim financial statements as for the annual report for 2025.

Notes to the interim financial statements

Note 03 Revenue

Amounts in USD thousand (Unaudited)	Quarter ended		Nine months ended	
	30 September 2026	30 September 2025	**30 September 2026**	30 September 2025
Revenue from contracts from customers				
Revenue from sales of petroleum products	**9**	-	**111,948**	-
Other revenue				
Assignment of tax oil	**8,633**	6,642	**44,917**	24,330
Assignment of royalties	**4,643**	4,636	**19,647**	14,319
Marketing fees	**-**	-	**-**	-
Total	**13,285**	11,098	**176,212**	38,649
Number of liftings	**-**	-	**1**	-
Quantity of oil lifted (barrels)	**-**	-	**964,593**	-
Average selling price (USD per barrel)	**-**	-	**116.05**	-
Quantity of net oil produced after royalty, cost oil and tax oil (barrels)	**254,855**	279,682	**834,782**	800,909

All revenue from the sales of petroleum products in 2026 is generated, recognised and transferred at a point in time. Invoices are due for settlement thirty days from the bill of lading, the point at which crude oil had been loaded onto vessel for shipment. All Group revenue is derived from production in the Republic of Congo from the PNGF Sud offshore asset, part of PetroNor's entitlement oil is taken as tax oil and royalty by the Congolese government as thus the volumes foregone to the government form part of PetroNor's revenue. The Group presents profit oil tax and royalties on a grossed-up basis as an income tax expense with corresponding increase in oil and gas revenues and any associated royalties are included in cost of sales. Tax oil and Royalty oil assigned to the Congolese government is valued at a market-based rate determined in country on a periodic basis.

Note 04 Cost of sales

Amounts in USD thousand (Unaudited)	Quarter ended		Nine months ended	
	30 September 2026	30 September 2025	**30 September 2026**	30 September 2025
Operating expenses	**6,237**	6,462	**17,517**	16,879
Royalty	**4,643**	4,636	**19,647**	14,319
Depreciation and amortisation of oil and gas properties	**5,158**	4,913	**15,066**	14,086
Provision for Diversified Investment	**310**	309	**1,310**	955
Subtotal	**16,348**	16,320	**53,540**	46,239
Movement in oil overlift position	**(32,173)**	(1,972)	**9,008**	(35,467)
Movement in oil inventory	**-**	(8,592)	**977**	(8,591)
Total	**(15,825)**	5,756	**63,525**	2,181

The Congolese government levies a proportional 15 per cent mining royalty on gross production before any cost recovery for the PNGF Sud licences, plus a further 1 per cent for Provision for Diversified Investment. High oil prices drive year on year variances. The movement in oil inventory reflects the reduction of the stock of oil to nil following the sales lifting, this is reflected in an offsetting reduction in the inventory asset in the statement of financial position. The "overlift oil" i.e. the lifting permitted that exceeds PetroNor's entitlement oil is valued at the sales price of the oil lifted., this is offset by the "Overlift liability". Please see note 14 for further details.

	30 September 2026	30 September 2025	**30 September 2026**	30 September 2025
Current income tax charge	**(9,603)**	(6,739)	**(45,969)**	(24,608)
Total	**(9,603)**	(6,739)	**(45,969)**	(24,608)

The tax expense in 2026 consists of two tax charges. USD 44.6 million relates to petroleum tax and the USD 1.3 million arising from other Group tax largely based on interest income. The petroleum tax charge relates to the Congolese subsidiary and reflects the State's entitlement to a portion of oil production under the applicable fiscal regime. Instead of paying taxes based on taxable income in cash, the government receives its share directly in physical oil. This includes a mining royalty representing a fixed percentage (15%) of gross production, as well as a share of profit oil (and super profit oil when oil prices exceed certain thresholds). Profit oil is allocated between the State and the joint venture partners in accordance with the production sharing contracts. As a result, corporate income tax is effectively settled through the State's share of profit oil, and no separate cash tax payment is made. Revenues from sales of petroleum products are therefore recognised net of the State's production entitlements (please see note 3).

Note 07 Earnings per share

Amounts in USD thousand *(Unaudited)*	Quarter ended		Nine months ended	
	30 September 2026	30 September 2025	**30 September 2026**	30 September 2025
Profit attributable to ordinary shareholders from continuing operations:				
Profit attributable to the ordinary equity holders used in calculating basic / diluted profit per share	**14,401**	(2,270)	**50,452**	3,875

(Unaudited)	Quarter ended		Nine months ended	
	30 September 2026	30 September 2025	**30 September 2026**	30 September 2025
Weighted average number of ordinary shares outstanding during the period used in the calculation of earnings per share	142,356,855	142,356,855	142,356,855	142,356,855

Notes to the interim financial statements

Amounts in USD Cents	**Quarter ended**		**Nine months ended**	
(Unaudited)	**30 September 2026**	30 September 2025	**30 September 2026**	30 September 2025
Earnings per share				
Basic and Diluted profit per share	**10.12**	(1.59)	**35.44**	2.72

Options on issue are considered to be potential ordinary shares and have been included in the determination of diluted loss per share only to the extent to which they are dilutive. There are nil options as at 30 September 2026 (2025: nil).

Note 08 Inventories

Amounts in USD thousand	*Notes*	**As at 30 September 2026 *(Unaudited)***	As at 31 December 2025 *(Audited)*
Crude oil inventory		**-**	661
Materials and supplies		**15,793**	14,433
Total		**15,793**	15,094

The crude oil inventory and the material and supplies inventory are valued at the lower of cost and net realisable value. Net realisable value is the estimated selling price, less applicable selling expenses. The cost of inventory includes all costs related to bringing the inventory to its current condition, including processing costs, labour costs, supplies, direct and allocated indirect operating overhead and depreciation expense, where applicable, including allocation of fixed and variable costs to inventory.

Note 09 Other receivables

Amounts in USD thousand	*Notes*	**As at 30 September 2026 *(Unaudited)***	As at 31 December 2025 *(Audited)*
Recoverability less than one year			
Other receivables[1]		**785**	7,905
Total		**785**	7,905
Recoverability more than one year			
Advance against decommissioning cost		**32,197**	31,700
Due from related parties	18	**14,981**	13,543
Fair value of contingent consideration		**1,880**	1,880
Total		**49,058**	47,123

In addition to the booking of decommissioning cost asset and corresponding liability, the contractors group on the PNGF Sud licence have advanced cash funds for the decommissioning cost that is held in an escrow account which is managed by the operator.

[1]On 18 February 2026, PetroNor completed the corporate acquisition of Aje Exploration Nigeria Ltd. As a result, USD 7.4 million from the 31 December 2025 other receivables balance was recategorized by 31 March 2026. This new Nigerian subsidiary holds a 32 per cent project and economic and voting interest in the OML 113 licence in Nigeria.

Notes to the interim financial statements

Note 10 Segment information

The Group only has one operating segment, being exploration and production of hydrocarbons.

The analysis of the location of non-current assets is as follows:

Amounts in USD thousand	**As at 30 September 2026 *(Unaudited)***	As at 31 December 2025 *(Audited)*
Congo	**105,981**	114,152
Norway and other countries	**15,440**	13,570
Nigeria	**20,046**	-
Guinea-Bissau	**1,880**	1,880
Total	**143,347**	129,602

As at 30 September 2026, PetroNor's underlying interests in OML 113 in Nigeria are now held by two separate corporate structures. Directly via subsidiary Aje Exploration Nigeria Ltd, detailed within Nigeria in the table above. Plus, indirectly, via the jointly controlled holding company Aje Production AS, this portion is classified within the Norwegian assets in the table above.

Note 11 Property, plant and equipment

Amounts in USD thousand	*Notes*	**For the nine months ended 30 September 2026 *(Unaudited)***	For the year ended 31 December 2025 *(Audited)*
Cost			
Opening balance		**161,909**	145,095
Additions		**12,673**	16,814
Closing balance		**174,582**	161,909
Accumulated Depreciation			
Opening balance		**80,787**	59,205
Charge for the period		**14,666**	21,582
Closing balance		**95,453**	80,787
Closing net carrying value		**79,129**	81,122

Notes to the interim financial statements

Note 12 Intangible assets

LICENCES AND APPROVALS

Amounts in USD thousand	**For the nine months ended 30 September 2026 *(Unaudited)***	For the year ended 31 December 2025 *(Audited)*
Cost		
Opening balance	**7,389**	13,803
Additions	**14,046**	261
Impairment loss	**-**	(6,675)
Closing balance	**21,435**	7,389
Accumulated amortisation and impairment		
Opening balance	**6,037**	5,625
Amortisation	**238**	412
Closing balance	**6,275**	6,037
Closing net carrying value	**15,160**	1,352

During the first half of 2026 PetroNor acquired 32 percent voting interest in the OML 113 licence, absorbing USD 14.06 million in intangible license value from the corporate acquisition of Aje Exploration Nigeria Ltd.

Note 13 Overlift payable

Amounts in USD thousand	*Notes*	**As at 30 September 2026 *(Unaudited)***	As at 31 December 2025 *(Audited)*
Amounts due less than one year			
Overlift payables		**9,324**	-
Total		**9,324**	-

A trading agreement allows PetroNor to lift and sell more oil than the entitlement interest it has in stock at the Djeno terminal. The Company lifted and sold 964,593 barrels of entitlement oil in April 2026 which represented a significant overlift of more than 500,000 barrels. This was replenished in the period between April and September being reduced to an overlift of 82,592 barrels by 30 September 2026. Overlift is valued at the realised selling price of the oil.

Note 14 Trade and other payables

Amounts in USD thousand	*Notes*	**As at 30 September 2026 *(Unaudited)***	As at 31 December 2025 *(Audited)*
Amounts due less than one year			
Trade payables		**3,307**	6,879
Other payables and accrued liabilities[1]		**10,489**	3,289
Taxes and state payables		**1,205**	487
Total		**15,001**	10,655
Amounts due more than one year			
Other payables		**342**	55
Total		**342**	55

[1]Through the acquisition of Aje Exploration Nigeria Ltd, PetroNor has added USD 4.3 million in joint-venture payables to the OML 113 operator in Nigeria.

Note 15 Related party transactions

Amounts in USD thousand	*Notes*	**As at 30 September 2026 *(Unaudited)***	As at 31 December 2025 *(Audited)*
Receivable from Aje Production AS and its subsidiaries		**14,981**	13,543
Total		**14,981**	13,543

The Company has joint control of Aje Production AS that indirectly holds interests in the offshore mining licence in Nigeria OML 113. Amounts due from Aje Production AS are interest free and have no fixed repayment terms.

Note 16 Provisions

Amounts in USD thousand	*Notes*	**For the nine months ended 30 September 2026 *(Unaudited)***	For the year ended 31 December 2025 *(Audited)*
Decommissioning Provision			
Opening balance		**29,586**	31,859
Additions		**6,063**	-
Adjustment to estimated retirement obligation		**-**	(2,625)
Unwinding of discount on decommissioning		**1,511**	352
Closing balance		**37,160**	29,586
Other provisions		**2,982**	2,982
Total		**40,142**	32,568

In accordance with agreements and legislation, the wellheads, production assets, pipelines and other installations may have to be dismantled and removed from oil and natural gas fields when the production ceases. The exact timing of the obligation is uncertain and depends on the rate the reserves of the field are depleted.

During H1 2026, PetroNor absorbed a decommissioning obligation with the acquisition of Aje Exploration Nigeria Ltd and its 32 percent interest in OML 113.

Note 17 Commitments and contingent liabilities

COMMITMENTS

Production asset commitments

PetroNor has approved budgets for PNGF Sud operations in 2026 that included USD 9.8 million for its funding commitment for planned capital expenditure.

CONTINGENCIES

Legal matters

In January 2026, Økokrim formally indicted group subsidiary Hemla Africa Holding AS ("Hemla") in relation to alleged historical corruption in the Republic of Congo. Hemla categorically contests the allegations and intends to defend the matter vigorously through the legal process.

As a consequence of the indictment, the Group has incurred and expects to continue to incur legal and other defence costs in connection with the proceedings. In addition, the matter exposes Hemla to a risk of potential fines or penalties depending on the final outcome of the case.

As at the reporting date, the Group has concluded that the matter represents a contingent liability under IAS 37. No provision has been recognised in respect of potential fines or penalties, as the Group does not currently consider it probable that an outflow of economic resources will be required, and the potential financial effect cannot presently be estimated with sufficient reliability.

The Group will continue to reassess the recognition, measurement and disclosure of this matter as the legal proceedings progress.

As at 30 September 2026, Hemla was a defendant in a civil lawsuit in the courts in Norway concerning a claim for compensation. The merits of the matter have not yet been scheduled to be heard in court.

No provision has been recognised in relation to this matter which is considered a contingent liability that cannot be reliably measured.

OML 113 Conditional Consideration

The Company acquired its equity interests in OML 113 in Nigeria via corporate acquisitions. Both transactions included additional consideration with either USD 0.10, or USD 0.25, per 1,000 cubic feet of the Aje Natural Gas Sales Volume to be paid once the conditions of these past share purchase acquisitions are met. The conditional consideration is capped at USD 16.67 million and USD 20.0 million for the two transactions respectively.

Note 18 Material Non-Controlling Interests

Set out below is summarised financial information for the subsidiary Hemla E&P Congo SA that has non-controlling interests that are material to the Group. The amounts disclosed for the subsidiary are before inter-company eliminations.

Summarised statement of financial position

Amounts in USD thousand	**As at 30 September 2026 *(Unaudited)***	As at 31 December 2025 *(Audited)*
Current assets	**68,728**	50,782

Total equity	**82,502**	72,168

On 28 May 2026, the Company's shareholders approved a repayment of capital of USD 50.0 million, which was subsequently paid during June 2026. The repayment was made by the parent company from its available paid-in capital in accordance with the Norwegian Public Limited Liability Companies Act and was supported by sufficient distributable paid-in capital in the parent company's separate financial statements at the date of approval.

Note 21 Post balance sheet events

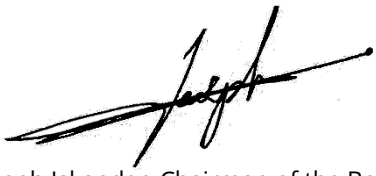

There are no significant events after the reporting date.

STATEMENT OF RESPONSIBILITY

We confirm that, to the best of our knowledge, the condensed set of unaudited consolidated financial statements as of 30 September 2026 has been prepared in accordance with IAS34 Interim Financial Statements, provides a true and fair view of the Company's consolidated assets, liabilities, financial position and results of operations, and that the management report includes a fair review of the information required under the Norwegian Securities Trading Act section 5-6 fourth paragraph.
